

59178

I'm requesting copies of the inspection reports for reported pothole on the A90 northbound just after the sliproad for B924.

Specifically, the reports dated 22/09/2025, and the inspection report dated 17/10/2025 along with any images of the area to substantiate the claim of 'no defects' in the area in question.

Please see the two separate reports attached. One for a routine mobile inspection carried out on 22.09.25. No actionable defects were noted so no records, no photos.

Inspection carried out on 17.10.25 was done in response to a claim. This was recorded against the claim ref 2028439. Photos are included in the attached report.

I'd also like to know about the system of inspection utilised to identify defects on the roads.

Please see attached Risk Based Approach document.
