

## 59253 5G Towers and 5G Panels

I request please to have the following information:

All locations of, and maps of (showing the whereabouts) of all 5G towers, and 5G panels (on buildings) and all internet, Radio and phone towers, situated in your district, and other future locations purposed for these as well.

This is not centrally held by the City of Edinburgh Council, however there is some information publicly available on the Planning Portal at:

<https://citydev-portal.edinburgh.gov.uk/idxpa-web/search.do?action=simple&searchType=Application>

This can be searched by keyword (for example "5g") to pull up applications received for new 5G masts, or alterations to pre-existing masts which require Planning consent and view results on a map. This will only provide a partial answer to the above.

We have Planning guidance which outlines the legislative requirements for telecommunications operators and the Planning authority when assessing the installation or replacement of ground-based telecommunications masts in Edinburgh. This can be found on our website at:

<https://www.edinburgh.gov.uk/downloads/file/30710/ground-based-telecommunications-masts>

The Scottish Government may hold this information nationally. There is more information, including contact e-mail address at:

<https://www.gov.scot/publications/forging-digital-future-5g-strategy-scotland/>

I also request to have:

All locations of, and maps of (showing the whereabouts) of all fracking sites, either active or no longer active, and future locations purposed for these as well.

This information is not recorded by the City of Edinburgh Council. If this does exist, it would be recorded centrally by the Scottish Government.
