

59330 James Gillespies High School - Assessments

Further to the Learning Estate Update: 2024 based School Roll Projections and Secondary School Capacity Review report of March, 2025:

Please could you provide me with a copy of all assessments of James Gillespies High School conducted for this review.

If this is not covered in the above assessments, I would specifically like a copy of the following information held by the council:

The current expected frequency of use of teaching spaces in practice, once timetabling constraints and curricular flexibility are taken into account, for James Gillespies High School.

In addition, any available breakdown of this information for its main campus and Darroch.

The physical space or 'building capacity' of the accommodation available at the school (both the main campus and Darroch).

A breakdown of the available teaching spaces (their capacities and their designation as either practical or non-practical) in the school, again stating if they are in the main campus or Darroch.

Either in a list format or plans of the buildings if available.

[The recorded information we hold in relation to your request is included in the attached documents.](#)

[This information captures what was recorded and agreed with the school as part of the Secondary Capacity Review and includes the floor plan mark-up. Although this shows what is recorded, you should note that the use of rooms is usually a little more flexible in practice.](#)

[Third-party personal information has been redacted from the documents provided in compliance with the Data Protection Act 2018.](#)

A copy of any suitability issues raised by JGHS as part of this revised school capacity process.

[The suitability issues raised were primarily related to the provision of additional practical subject spaces, which did not impact on the Planning Capacity calculations. A project is now underway to utilise the Rising Rolls building at James Gillespie's Primary School to provide an additional Craft, Design and Technology \(CDT\) workshop and two additional Science Laboratories.](#)

The March 2025 paper said new planning capacities would be reviewed annually as part of the S1 intake process to reflect any changes in the use of school accommodation, if any review has taken place at JGHS then please can I have a copy of the outcome.

[There was no change to the use of spaces at the end of last session and therefore the planning capacity total was unchanged. This will be reviewed again with the school towards the end of this current session.](#)
