

## 59466 Missing Refuse Bins

I would like to know how many refuse bins (garden, land fill or recycling) are reported missing each week. Of those reported missing bins i'd like to know how many times the refuse collectors reported it to the household prior to them contacting the council.

Between January 2025 to 2026, there were approximately 348 bins reported missing each week. The Council does not record the number of occasions where the refuse collectors reported it to the household prior to contacting the Council.
