

59609 Accidents Involving Cyclists

Please supply me with details of all accidents involving cyclists and the Edinburgh tram network from January 2022 to date.

Information to include:

Date, Time, Location, Description, Unique Reference No.

I do not require any personal information but the Description should enable the circumstances and cause of the accident to be identified.

Please refer to the attached document which provides the incident month and year, the location, and the recorded incident details.

Given the small number of incidents in each month, we are unable to provide precise dates, a more detailed description of the incidents or unique references for each incident as this could lead to an individual being identified. This is withheld in compliance with the Data Protection Act 2018.

We do not record the time of the incident.
