Insurances and qualifications required are detailed in the Framework Guide above.

Please can you confirm what the job specification is?

The monitoring and evaluation of blocks of flats where retrofit works, mainly installation of external wall insulation, has been carried out. The monitoring should include temperature, humidity, CO2, energy consumption and resident questionnaires, pre and post works. Evaluation of the findings in the form of a report. And Social Value outcomes as part of monitoring, a focus on fuel poverty outcomes and affordability for residents to heat their homes. The reduction in carbon emissions calculated because of the works should be included in reporting.
