

59908 Short Term Let Public Register

I see that the Short term let public register shows a summary of current licences and applications received. However, this only represent the current time, to fully understand the impact and state of Short term let in Edinburgh: I would like for the at least the last 2 years of applications to be available. This data does not need to be 'prepared' in any way, I am happy receiving all the snapshots of The Short term let public register for the last 2 years.

[The Short Term Let Licensing Register is available from the Council's website, which provides applications from 04/10/22 to present.](#)
