

60031 New Town and Broughton - Street Cleaning

Does the Council have any records of the streets that have been 'spot checked' by managers and supervisors to achieve benchmark standards of street cleaning in the area covered by the New Town and Broughton Community Council for the period 1st June 2025 to 31st December 2025?

If so, will the Council please disclose the information outlining the date of each inspection in each location and the findings of the inspection showing that a satisfactory standard has or has not been achieved?

Supervisors and managers carry out visual spot checks so they can plan for the following days' work. The Council do not hold any records to say what streets have been spot checked in the New Town and Broughton area for that period. Street cleansing is a statutory duty under the Code of Practice (COPLAR) and cleansing frequencies are designed to meet those standards, in line with how the streets are Zoned under COPLAR.
