

60038 Inspection of Roadways

I am wanting to a copy of the working procedures that the Council use for the purposes of the inspection of roadways in the City of Edinburgh. These should provide details of the the methods used, the scheduling of the inspections, equipment used.

Methods of inspection.

Please see our Risk Based Approach attached.

Size of inspection team

There are 5 Inspectors responsible for routine Safety Inspections and 5 Inspectors responsible for reactive inspections.

Qualifications of the personnel used.

The City of Edinburgh Council utilises the SCOTS Risk-Based Approach to Safety Defect Inspections methodology and training resources. All safety inspectors undertake Road Safety Inspectors' Modular Training and Assessment provided by an accredited training provider in line with the UK Roads Leadership Group and are on the National Register of Highway Inspectors.

Repair and quality control inspection sheets, material data etc.

Strategy of repair to potholes to be provided.

Please find attached our operating procedure for temporary pothole repairs. The material we use is a cold lay material called Ultipatch, supplied by Tarmac. Third party personal information has been redacted from the document provided.
