

60050 Lothian Pension Fund - Government Policy and Saving Behaviours

I am doing a research piece on the affect of government policy on saving behaviours and LGPS funds have a great amount of data on public bodies. Therefore I am making a freedom of information act to yourselves to obtain this information.

I am looking to obtain an excel sheet with the following columns:

Employer Name

Number of Active Members (per employer)

Employer Contributions (per employer)

Employee Contributions (per employer)

Most of the information you requested is attached. Where we have a table for employers with 10 or fewer active members, we have provided totals for employee and employer contributions and the number of active members. Providing the breakdown could allow for a member's pay to be revealed, as contributions are directly linked to pay.
