

60130 Edinburgh Tram Proposal

Please can you confirm in total the maximum number of miles of current Active Travel Routes, such as the Roseburn Path and Newhaven Waterfront, the plans could utilize.

Details of the tram extension proposal can be found on our website at:

<https://www.edinburgh.gov.uk/public-transport/trams-granton-bioquarter-beyond>

This includes details of one proposed alternative Granton-City Centre route along the Roseburn Path, which would retain active travel provision.

Please can you also confirm that the committee will not grant funding to the line between McDonald Road and Meadowbank to be converted to a bike path, in the hope that one day it may be used for a tram?

The Trams from Granton to Edinburgh BioQuarter / Royal Infirmary of Edinburgh and beyond is the only tram extension route the Council is currently working on.
