

60439 Waste Management, Disposal and Recycling Contracts

I am writing to request information relating to contracts for waste management, waste disposal and recycling services held by the Local Authority.

I would like to receive details of all such contracts currently in force, and those that have expired or been replaced within the last 5 years.

For each contract, please provide:

1. Contract description
2. Contract start date
3. Contract end date
4. Contract duration (initial term)
5. Contract duration including extensions (if applicable)
6. Annual tonnage or service volume (e.g., tonnes per year covered by the contract)
7. Incumbent contractor name
8. Total contract value (including extensions)

Where available, please supply this information in spreadsheet format (e.g., Excel or CSV) example attached.

The details of the contracts we consider to be within scope of your request are included in the attached spreadsheet.

Please note that the list may contain contracts that are ancillary to actual disposal, e.g. haulage, however these have been included as they relate to Waste Management.

Regarding Point 6 – Annual tonnage, the tonnage figures from Waste and Cleansing are available to the public through SEPA's website at:

<https://informatics.sepa.org.uk/HouseholdWaste/>

The latest figures available are for 2024, with the 2025 figures being reviewed by SEPA for publication in September/October this year.
