

60647 Electrical Materials Procurement Spend by Supplier

I would be grateful if you could provide the following in relation to your council's procurement of electrical materials and associated products:

Total annual spend on electrical materials for each of the following financial years:

- 2023/24
- 2024/25 (full year if available, or year-to-date)

[Please refer to the attached document.](#)

A breakdown of that spend by individual supplier for each year, showing the amount paid to each.

[Please refer to the attached document.](#)

The procurement route used in each year (e.g. Scotland Excel framework, Scottish Procurement Alliance, direct contract, open tender) and the specific framework reference where applicable.

[We use Scotland Excel Framework Construction Materials 1422 \(and prior to June 24 the SXL Trade Materials Framework\). We also have our own contract CT2525 Supply and/or Delivery of Trade Material Commodities and Associated Services with Travis Perkins for our Housing Operations Section.](#)

If there is little or no direct spend on electrical materials due to you not having a DLO and/or subcontracting your electrical maintenance, please advise which supplier / contractor you have sub-contracted to.

[Not applicable.](#)
