

60716 Bin Hubs - Records and Communications

I request a copy of all records and communications containing discussion (feeding into the decisions made) and justification of why, or why not to make changes to each of the 266 bin hubs listed as a priority hubs as part of the second review of bin hubs in-line with the November 2024 update criteria.

Of the 266 bin hubs on the priority list for the second review, changes are being made to 22 bin hubs, as per the report (item 8.1 Communal Bin Review update) discussed at [January's Transport and Environment Committee](#). The approved, adjusted motion from the Committee meeting (point 7) states:

“To agree to publish the full list of all 266 requested reviewed bin hubs and the reasons given for the review outcome for each individual hub.”

As per the [communal bin review](#) page on our website, we were unable to make changes to the remaining 244 bin hubs on the list due to the constraints of each street/ location.
