

61024 Boroughmuir High School - Request for Health & Safety, Fire Capacity or Building Suitability Assessments

Please provide records of any health & safety, fire capacity, or building suitability assessments that reference roll related concerns at Boroughmuir High School.

We are not aware of any records referencing roll-related concerns other than the CLT Report (attached) and the Holmes Miller Occupancy Report (attached).

However, the Holmes Miller report must be considered in context: this is an initial report as part of a wider piece of work and is based on the escape stair widths and final exit widths of the core escape stairs only. It does not take account of the additional fire escape facility at the main entrance/exit doors on the south elevation or of any other fire engineering solutions.
