Taken from email enquiry below:-

'there are vehicles turning left from Princes St onto Waverley bridge and coming head-to-head with buses.

There are no signs on Princes St to tell drivers that they can't turn left, and this is dangerous.

Also, the Buses only signs that were on Waverley Bridge have disappeared and there are taxis lorries and other vehicles using it constantly.

Hopefully, these issues can be addressed.'

Subject: RE: 80-83 Princess Street Edinburgh - URGENT

Hi [REDACTED]

Thank you for your email, I have forwarded this to the customer care team who will raise an enquiry on the Councils asset management system called Confirm, this will then be allocated to the asset inspection team for them to attend site and assess the reported issues with the footway condition and the Aco drain, the inspector will raise any required works orders.

The will also be able to contact the customer regards the water ingress to the property, however this is not something the Council has any responsibility for, the materials used in footway and carriageway construction are not designed or required to be waterproof and water will percolate through these materials and construction joins joining the natural ground water. It is either the owner or tenant's responsibility depending on their agreement to ensure the property is watertight both above and below ground level.

Regards

Ken

Morning [REDACTED]

See query below, and the report attached. Can you advise who is responsible for this section of paving and/or the on-pavement gully?

Subject: 80-83 Princess Street Edinburgh - URGENT

Importance: High

Hi F [REDACTED] ope all is well. I hope you can assist, or alternatively direct me to the appropriate contact within Edinburgh Council.

Hi [REDACTED]

Hope all is well.

I hope you can assist, or alternatively direct me to the appropriate contact within Edinburgh Council.

My client owns the retail/office property at 80-83 Princes Street. Our contractor recently attended the Superdrug unit and reported that the external acco drain is blocked and that the paving is significantly damaged. This has resulted in water ingress and damage at basement level within the store.

As the pavement is adopted by the City of Edinburgh Council, responsibility for its maintenance and for ensuring the associated drains are kept clear rests with the Council.

I have attached the contractor's report, which provides full details of the issue.

I look forward to hearing from you.

Kind regards  
[REDACTED]

It was not far from St.James centre but its not just one or 2 slabs in this condition its practically the whole off Princess street I uou live in Edinburgh you are bound to know of the appalling  
conditions thankyou for getting back to me however it is a very poor advertisement for visitors coming from far and near to be met with these poor conditions which I have no doubt will just be left  
Other details : The pavements along Princess Street are ridiculous they are broken wobbling loose and moving |

**Location:** Urgent there's a huge [about 40cm long x about 40cm wide x about 20-30cm deep      **Contact:**  
pothole in road next to "PU" bus stop on Princes St EH2 3AA [opp' buildings  
between levis & boots chem shops.]  
It's so huge that if a cyclist cycled into it there's very serious poss' front wheel would  
jam in it with a serious risk the cyclist would be thrown off bike by impact or bike  
would fall into path of any traffic coming up behind bike.  
It's in area a cycle lane would be in.

**Location:** It is a really bad pothole now... I've reported it twice !      **Contact:**  
 It is right on the inside tyre line for buses etc. at the junction of the Mound, but on the north side of Princes Street at the Lights.  
 There is a sunken small manhole 50 yards west also and a poorly filled pothole between the two. Sorry the photo is in shadow.  
 I can't believe these are not filled and or repaired this is our main tourist road ! I first reported it months ago.

If your comments relate to a council service for which you have an account then please provide an account number :

Short description of complaint : Excessive noise from Road works on Princess Street directly adjacent to Frederick Street woke us up at 4.00 am this morning.

Please provide the details of the complaint : Whilst the above road works at 4.00 am may have been urgently required every attempt should have been made to mitigate noise pollution to local residents by rescheduling the works to a more time or if this was not possible by using equipment more suitable to producing less noise For example by possibly making some sort of provision for acoustic screening (fencing or barriers). Contractors should be made aware that people do live and sleep in the city centre.

How would you like us to deal with this? : Review out of hours risk assessments for city centre road works to ensure that the noise risks to city centre residents are always suitably addressed. This assessment review should be extended to night clubs in Frederick Street where people make really very excessive street noise when their clients leave in the early hours especially at the weekend which again causes residents to lose sleep.

**Desc.:**  
**Location:** Large pothole - approx 10" diameter in the road and 3" deep. Within the "bike box" heading east at the junction about 12" from the pavement. **Contact:**  
 This would crash any bike ridden into it, and high risk of damage to any vehicle (taxi/bus) driven over it due to size.  
 It looks like tar has been applied previously without a permanent fix.

<b>Desc.:</b> Dangerous pavement princes street there is a slab very uneven and moving a lot. Lot of people tripping on this. If you are on princes street there is a coffee shop called black sheep coffee at number 24 – 25 princes street. The paving slab in question is on the opposite side of road directly opposite that coffee shop and outside Waverley market. There is a pedestrian crossing which runs between the coffee shop to the other side of road. When you get across that crossing the slab is right in the middle of the pavement just as you step off the road at Waverley market side.

What kind of feedback would you like to provide? complaint  
What area does your complaint relate to ? road\_travel\_parking  
Account Number:  
Short description of complaint: Dear C E C, I must intimate my dissatisfaction and disappointment with the badly maintained roads , pavements, road markings and signage , city wide.  
How would you like us to deal with this? I'm sure that the answer is regular maintenance of a decent standard across the board on all issues and probably serious financial penalties for litter dropping and dog fouling, an awareness campaign might also be beneficial. I believe that past bylaws are in place requiring shop owners / businesses to keep the front of their premises clean.

[Redacted] . All along Princes Street there are loose pavement slabs that are either cracked or wobbly and someone could easily trip (I in fact have witnessed someone have a bad fall due to the loose slabs) and hurt themselves and potentially break an ankle. I would like to understand why you do not believe loose or broken slabs pose a safety risk.

**Desc.:**  
**Location:** The whole of Princess Street is a disgrace. There are loose pavements everywhere and they are a danger to pedestrians, not to mention the embarrassment for visitors to the City. This is an issue that has been ongoing for a couple of years. There was an attempt last year to fix some of the loose paving stones but the problem has returned. The ban on pavement parking will definitely help avoid any further damage but the current state of the pavements needs resolved immediately.      **Contact:**

Subject: Road issue

Hello

The section of princes street and Fredrick street is the worst I've ever seen for potholes. This is the Main Street of the capital city of our country and it's left in this state. Wow guys, wow, really poor. Why has it been left so poor for so long??

**Location:** This part of the road is riddled with potholes, dangerous for cyclists and pedestrians and will also cause damage to busses and other vehicles      **Contact:**

**Desc.:**  
**Location:** The road surface is badly potholed at the junction which seems amazing since this is a primary road in our capital city !  
Furthermore there are 3 manhole covers badly clanging ( again ) both sides of the tram stop.  
Again, !!!!! on a 'new' road surface this seems incredible, especially if repairs lead to all traffic being diverted onto the tram lines.  
How do international road authorities build these manholes ?  
Could temporary thick rubber 'plates' be used to 'level up' the sunken surfaces.

 Location: There is a small ridge on the left of the pedestrian crossing at the corner of Waverley Bridge and Princes Street (when walking onto the pavement from Princes Street). It's where the ramp with bumps for visually impaired people meets the normal pavement level - rather than sloping there is a small step up. This is a trip
