

61307

Could I get the following information for the roads listed below please:

The 3 roads I'm interested in are:

- West Mill Road in Colinton;
- Seton Place in the Grange
- Woodburn Terrace in Morningside.

The dates of the last 2 road surveys.

West Mill Road was last scanned on 10 September 2025 and 6 November 2020.

Seton Place was last scanned on 13 June 2021 and 18 March 2011.

Woodburn Terrace was last scanned on 9 September 2023 and 4 November 2020.

Results of those surveys, including their classification & treatment.

See attached file.

The ranking of these streets in their categories at the time the Transport Capital Investment Programme 2026/27 was published.

Streets aren't ranked in their entirety, they are ranked by section. The highest ranked section of West Mill Road is ranked 55th of all the Red sections within Edinburgh. Seton Place is ranked 41st out of all of the Amber 1 sections within Edinburgh. Woodburn Terrace is classified as Green and therefore not ranked.

Confirmation that if ranking of road is N then that means N-1 roads have a higher priority for the treatment listed.

When producing the programme Red sections are ranked alongside other Red sections for Strengthening repairs and Amber 1 sections are ranked alongside other Amber 1 sections for Resurfacing repairs. If we interpret your question correctly then yes, sections ranked 1st, 2nd etc. are the highest priority for repair.
