

## 61368 Pupil Movement (Private to State Sector) and University Progression Data

I am writing to request information regarding pupil movement between independent/private and state schools in S6 or tail end of S5, and subsequent progression to Scottish universities.

Specifically, I would like to request the following information for the most recent five academic years available:

### **Pupil Transfers**

The number of pupils transferring from independent (private) schools into local authority secondary schools for S6 (sixth year).

Where available, a breakdown by previous school type and receiving school.

Seventeen pupils have transferred from the independent sector to City of Edinburgh Council Secondary Schools since January 2024.

Prior to January 2024 such information was not recorded.

Due to the small number of pupils, the names of the eleven Secondary Schools these pupils transferred to are withheld in compliance with the Data Protection Act 2018.

### **Attainment Data**

Of those pupils identified above, where possible, the number and level of qualifications held on entry to S6.

We do not record the qualifications held by pupils transferring from the independent sector; only the qualifications achieved after transferring.

### **University Applications and Acceptances**

The number of these transferred pupils who submitted applications to Scottish universities via UCAS during their S6 year.

How many of these pupils ultimately accepted a place at a Scottish university (broken down by which university)

We do not record this.

### **Contextual or Admissions Classification (if held)**

Any data held on how these pupils are classified for reporting or admissions purposes (for example, whether they are recorded as state-educated based on their S6 school).

The City of Edinburgh Council does not classify pupils in this way.
