Subject: FW: Building Warrant Application Ref.: 22/02508/WARR

Good Afternoon [REDACTED]

Just to let you know I have instructed admin to grant the Stage 1 warrant for this application.

I note there was no response to the item on my report requesting correspondence from Scottish Water for the drainage proposals. Consultation with Scottish Water should not delay the issue of a building warrant, however, the obligation is still there to pass the information to me when available. It should be noted that any requirements intimated by Scottish Water which results in a change of design, may result in the requirement for an amendment of warrant.

Regards
