

61580 Council Art

Details of the 50 most-expensive art or museum artifacts owned by the council or its leisure and culture arm. Please include the estimated value of each, their location/exhibit.

We do not hold a record of the valuation of our entire collection. In terms of the valuations of the Council's artworks, it should be noted that the Council operates within the Museums Association Code of Ethics which recognises the principle that collections should not normally be regarded as financially negotiable assets but are viewed as cultural assets. However, as an insurance requirement, we would hold valuations for missing or stolen artworks.
