

62137

The total spend by NHS Lothian (or the Edinburgh Health & Social Care Partnership) on healthcare services for asylum seekers and refugees in the financial years 2023/24, 2024/25 and 2025/26 to date.

Unfortunately, we are unable to provide you with the information requested because it is not held by the Council. This information would be held by the NHS.

A breakdown of the above spend by the following categories (where recorded):

- o Primary care / GP services
- o Mental health services
- o Maternity and children's services
- o Hospital admissions and acute care
- o Drug and alcohol services
- o Any other categories

Unfortunately, we are unable to provide you with the information requested because it is not held by the Council. This information would be held by the NHS.

The total additional costs borne directly by Edinburgh City Council (not NHS) for social care or support services provided to asylum seekers and refugees in the last three financial years.

The Council is unable to quantify total spend for support to asylum seeker/refugee households as it does not seek or hold information on residency status outwith specialist services. Although not accounting for the total social care spend on asylum and refugee households, the Council can confirm the following expenditure on support for households resettled under UK Government resettlement schemes (Syrian, Afghan, United Kingdom Resettlement Scheme (UKRS)):

2023/24	2024/25	2025/26
£1,647,815	£1,975,786	£2,050,046

The current number of asylum seekers and refugees registered with GP practices in Edinburgh.

Unfortunately, we are unable to provide you with the information requested because it is not held by the Council. This information would be held by the NHS.

Any additional or ring-fenced funding received by NHS Lothian or the council specifically for healthcare provision to asylum seekers and refugees in the last three years.

Unfortunately, we are unable to provide you with the information requested because it is not held by the Council. This information would be held by the NHS.
