
Tree Code: 31248

Seq No: 13

Species: Aesculus hippocastanum

Site: Fairmilehead Park

Tree Works: 16/06/2026

Height: 15 to 20 meters

Age: Mature

Trunk: 90 +

Spread: 9 to 12 meters

Visited By: ECS

Condition: Poor

Recommendations:

Works: Section Fell

Features: Footpath under canopy
Property within falling distance
Road within falling distance
Wall or fence within canopy
spread

Conditions: Armillaria spp
Branches infringing
footpath/paveme
Basal rot
Cavity - Small
Dead wood <30mm - minor
Narrow forks with included bark
Limbs previous failures
Roots
damaged/exposed/restricted
Raised roots/buttrissing
Stem sweep/bend

Comments: Small cavity formation from
previous pruning wound on south
aspect of main stem, approx 3m
from ground level. Investigation
with podger showed decay not
extend beyond surface of wound.
Cracked/lifting bark on tension
side of large lateral, 3.5m from
ground level, south aspect.
Small hollow at ground level, NW
aspect, podger extends in 20cm
from edge of butress.
extensive decay on the south east
side at ground level podger goes
all the way in so 30cm plus. signs
of honey fungus around the
decaying areas and bleeding
cancur exudes up the trunk.

trunk has been left as a monolith
but still to be lowered by a few
metres

Inspection: 25/01/2024

Height: 15 to 20 meters

Age: Mature

Trunk: 90 +

Spread: 9 to 12 meters

Visited By: GA
