

62875 A71 Dalmahoy Junction Improvement Project

A71 Dalmahoy Junction Improvement Project – SEPA Correspondence and Related Design Changes

Project: A71 Dalmahoy Junction Improvement Project (Dalmahoy Junction Signalisation Scheme) Period: 1 January 2019 to present.

Please provide:

All correspondence between the City of Edinburgh Council and the Scottish Environment Protection Agency (SEPA) relating to the A71 Dalmahoy Junction Improvement Project.

[There has been no such correspondence between The City of Edinburgh Council and SEPA.](#)

Any reports, meeting notes, technical notes, design reviews or project updates which record, discuss or summarise comments, requirements, recommendations or concerns raised by SEPA in relation to the project.

[There has been no correspondence between The City of Edinburgh Council and SEPA about this matter, thus there is no correspondence of this nature held.](#)

Any documents identifying design changes made as a result of:

- SEPA requirements;
- SEPA recommendations;
- environmental regulatory requirements;
- statutory environmental requirements.

[SEPA requirements - No design changes have been made as a result of SEPA requirements.](#)

[SEPA recommendations - No design changes have been made as a result of SEPA recommendations.](#)

[Environmental regulatory requirements - No design changes have been made as a result of environmental regulations.](#)

[Statutory environmental requirements – . No design changes have been made as a result of environmental requirements.](#)

Any records identifying whether SEPA requirements or requests affected:

- project design;
- project programme;
- procurement;
- construction commencement dates;
- project delivery timescales.

[Project design – From the outset the drainage design has taken SEPA requirements into account, thus there are no records of this nature held.](#)

Project programme – The programme for delivery of this project has not been affected by following SEPA requirements, thus there are no records of this nature held.

Procurement – The delivery of this project has not reached the procurement stage, thus there are no records relating to this aspect of the project delivery held.

Construction commencement dates – The delivery of this project has not reached the construction stage, thus there are no records relating to this aspect of the project delivery held.

Project delivery timescales – The project delivery timescales have not been affected by following SEPA requirements, thus there are no records relating to this aspect of the project delivery held.

Any records referring to the statement that design changes were made to accommodate 'SEPA and other statutory requirements'.

No design changes have been required as a result of accommodating SEPA or other requirements.
