

63064 Land extending to 40.92 hectares at Lauriston Farm, Edinburgh

In the response to FOI request 62197, it was suggested to me I send another FOI request to obtain a copy of the B.Plan Addendum - dated July 2023', cited on page 2 of the Modern Limited Duration Tenancy between The City of Edinburgh Council and Edinburgh Agroecology Co-op CIC', document number 5093, for the subject 'Land extending to 40.92 hectares at Lauriston Farm, Edinburgh'. I understand from this FOI response that the document also contains the Health and Safety Plan and Risk Assessment plan.

The response suggested I file another FOI for the document after 30 June 2026 when the council would learn from the other contract party whether it agrees to the disclosure.

The Business Plan addendum as requested has now been received from the tenant and is attached. Updated risk assessment information has also now been provided by the tenant and this is attached.

Third party personal information has been redacted from the documents provided. Under Regulation 11(2) of the EIRS, read in conjunction with regulation 11(3A)(a), personal data can be redacted if its release would breach any of the principles detailed in the Data Protection Act 2018. I consider that disclosure of this information would breach the first data protection principle, that of fair processing, as it would not be fair, or expected, for information which could identify these individuals to be released into the public domain in response to this request.

This constitutes a formal refusal notice under regulation 10(3) of the EIRS concerning any personal information which we have not disclosed.
