

63071 Maintenance Records for A90 Slip Road

I would also like to see the maintenance records for A90 Slip Road at Burnshot as to ascertain how often the vegetation and foliage is cut back and when exactly the last time this was in fact cut back.

The Cycleway Team within our Neighbourhood Environmental Services keep the pathway along the A90 slip road clear. This is just basic maintenance involving keeping the wall edge clear of weeds. This is carried out approximately six times per year. There are no records kept of this.

The vegetation/trees behind the wall are on private land, so there are no records held by the Council in relation to this area.
