Subject: RE: Lamp columns on GIS

Hi Steve and everyone,
How are you?

Just chasing up this request to update the location of your lamp columns on GIS so I can use the correct positioning to show measurements for a new bus bay on the south-west side of Viewforth.

The CEC atlas show this:

Here is a photograph showing there is an additional lamp column on the south-west side replacing that on the north-east side.

Please could you update the CEC atlas as soon as possible so I can progress the order?

Many thanks for your help!

Best wishes,

Mark/OO\

Subject: Lamp columns on GIS

Hi Steve,

How's it going?

I was looking on both the council atlas and Smallworld for the section of Viewforth by the new Boroughmuir and noticed there was still a lamp column shown outside the sub-station whereas it's now on the opposite side of the road.

Is there up to date mapping available or is this something that needs to be updated?

Hope you're well!

Best wishes,

Mark/OO\
