Subject: Danube Street Local Traffic Improvement Scheme – Resident Engagement
Date: 10 July 2026 15:54:32

Dear [REDACTED] ,

I am a resident of Danube Street and understand that the proposed Local Traffic Improvement scheme at:

- Danube Street / Dean Terrace
- Danube Street / St Bernard's Crescent

is currently progressing through the design stage.

As a resident directly affected by the proposal, I would be grateful if you could:

1. Confirm the current stage of the project.
2. Advise whether any concept or preliminary drawings are available for residents to view.
3. Confirm whether public consultation or stakeholder engagement is planned as part of the design process.
4. Add me to any consultation, stakeholder or project distribution list relating to the scheme.

I would also be interested to understand the principal objectives of the scheme and the evidence currently being relied upon in support of the proposed junction narrowing.

Given the location within the New Town Conservation Area and the wider historic townscape significance of Danube Street and its surrounding streetscape, I would also be grateful to understand how heritage, conservation, townscape and streetscape considerations are being taken into account within the design process.

Thank you for your assistance.

Kind regards,

[REDACTED]
