

63438 Liberton High School

For Liberton High School, can I please have a paper copy of the asbestos survey / report and the method statement and risk assessment for the works and how the dust is going to be controlled?

We are unable to provide the asbestos survey report or method statement/risk assessment at this point, as the contractor has not commenced the survey. This can only start after the contractor has taken over the old school building. The asbestos survey report will identify the areas of asbestos presence, its type and location, allowing the licensed asbestos removal contractor to prepare a Method Statement and Risk Assessment. These will be issued to the Health & Safety Executive prior to any asbestos removal works commencing.

The Council's Asbestos Officer has been engaging with the project team and the main contractor on the matter and will be supporting the process.

We asked the main contractor to arrange a public meeting to outline the approach to asbestos removal and the dust and noise control measures during Phase 2 of the works.'
