

63572 Road Adoption and Parking - Appin Place

Edinburgh Council apparently adopted the road, paths and 34 parking spaces in the private development at Appin Place EH14 (known as Slateford Village)

Please provide me with the communications (emails and letters) between Taylor Woodrow/Wimpey and the council which demonstrate the requirement for the council to adopt the spaces.

Please note, Taylor Wimpey has confirmed they hold no documentations relating to the development for this period.

Our, Road Construction Consent team have identified the Adoption Certificate which includes the plan and the letter issued to Taylor Wimpey in 2010. These are attached.

Third party personal information has been redacted from the documents provided in compliance with the Data Protection Act 2018.

Please tell me how many permit parking spaces there are in S6 and how many permits have been purchased.

1,482 Residential Parking Permits are active in the Zone and there are 1,756 Permit and Shared-Use parking places (both available to Permit holders). Please note that Permit Parking areas do not contain marked bays but do provide additional space for specific residential Parking Permit holders.
