Additional Funding for Partner-Provider Nursery Provision

Has the Council requested additional funding from the Scottish Government at any time since March 2018 specifically to support demand for partner-provider nursery places above the proportion assumed in its original financial model?

Has the Council raised the inadequacy of this funding with COSLA or sought agreement about how the additional expenditure should be managed?

If so, when was each request or representation made, what funding or action was sought, and what response was received?

If no such request or representation was made, why has the Council failed to do so despite repeatedly citing insufficient funding as the reason for seeking to restrict partner provision?

Information not held.
