

63940 Public realm CCTV cameras

If you could confirm the correct email address for requesting CCTV from the council for the public realm cameras?

Requests for City of Edinburgh Council public space CCTV data should be submitted through the [subject access request portal](#).

If you could confirm how long the CCTV is kept for?

Public space CCTV data is retained for 31 days, after which period it is irrevocably deleted from the storage system.

If you could provide a map to show the location for all the public realm CCTV cameras owned by the council within the city of Edinburgh?

If you could provide a list of the addresses and locations of all the public realm CCTV cameras within the city of Edinburgh owned by the council?

There would be an increased security risk, in terms of identifying in advance where our public space cameras are located, as an individual with malicious intent could take advantage of this information by avoiding detection while conducting criminal behaviour. In addition, by publishing locations of cameras, there is a risk that this would cause vandalism of our cameras. This would increase the risk of endangering the health and safety of individuals.
