

64033

Confirm that this fault has been logged and provide the relevant reference number.

A fault was logged on our system 17/08/2026, City of Edinburgh Incident 8440928

Confirm, under the Freedom of Information Act, whether this particular traffic-light fault has previously been reported.

Yes

If it has previously been reported, please confirm the date(s) on which it was reported and how long the signal has been defective.

Previous reports received 18/07/2023, 24/01/2024 & 28/04/2025.

The signal is not defective; it was disconnected on 10/07/2023. The right turn filter was not part of the original traffic signal installation in September 2015 and was only installed to facilitate the diversion route as part of Trams to Newhaven construction works on Leith Walk in 2022.

Confirm whether this junction is recorded as a high-incident or high-accident location, and provide any relevant accident/incident statistics for the junction, particularly those involving traffic-light issues, cyclists or pedestrians.

In the latest available 3-year period (between 09-July-2023 and 08-July-2026) there were no personal injury collisions reported to the Police at London Rd/Easter Rd junction (highlighted area). Please note that the collision retrieval undertaken and any data provided is accurate as of 21/08/2026
