Thanks [redacted]

In terms of comms, nope as the meeting is a response to a letter from Councillor Cuthbert, so I am not sure we would be sending Comms in response to a meeting request.

I am asking Midlothian and Edinburgh Council staff to support ourselves to show we have a combined strategy on what is being done. Not really wanting it to become a meeting with numerous people, given the site aspect. You will see the ask is for a CEC member of staff who was at the meeting, so I have extended to a MC staff member as well.

I believe that BEAR ([redacted]) has been looking at a more general meeting for all elected members to be held after the measures are installed.

Hi [redacted]

I cannot attend as I am on leave that week. I have asked our Communication Team Leader ([redacted]) if she is able to attend, and whether any Midlothian Councillors would wish to attend the site meeting.

Has there been any comms circulated by TS or Bear to date that can be shared with our Councillors?

Kind regards,
[redacted]
