

64247 St Marks Footbridge

I am writing to request any reports, submissions and surveys completed by structural engineer on damage to the St Marks Path footbridge that has caused its closure, as set out on your website.

Please refer to the following attached document – ‘64247 Powderhall Footbridge No2 - Critical Defects Tech Note’.

Additionally, I am requesting all correspondence that references the closure between Edinburgh council employees and CCG construction in the time period 20-30 June 2026.

Please refer to the attached correspondence between CCG and the City of Edinburgh Council Development and Regeneration service. This correspondence with CCG's Site Manager at Powderhall between 20-30<sup>th</sup> June 2026 is asking if they knew anything about the closure of the bridge. It was only latterly that the Development and Regeneration service were made aware that the bridge was closed by the Parks team on advice of our Structures team. There is no other correspondence held between the Council and CCG.

Third party personal information has been redacted from the documents provided in compliance with the Data Protection Act 2018. Further redactions have been applied where the information is not within scope of the request, i.e. where it does not relate to path or bridge closure.

I would also like you to provide justification as to why the 'damage' prevents public access on bike and foot.

This is included within the attached report.
