Location: Following the resurfacing of the A8, the contractors are replacing the crossing at the junction of Balgreen Road and the A8. I have noticed that the footprint of the traffic island in the middle of the road is significantly smaller than what was previously there, especially considering there are four lanes of traffic running around it. We have to use this crossing very regularly [REDACTED], and this is likely to be a big problem for us. Is there a considered reason why this is so? Contact:

Location: There is a loose manhole cover at this location. Specific location is ///violin.lists.agreed. This manhole cover has been loose for weeks and keeping residents over 3 streets away awake at night. It is on the main A8 Corstorphine Road, so is trafficked every few seconds. Openreach have confirmed it is not one of theirs and they believe it to be an Edinburgh Council general manhole cover. Please arrange for urgent repair or procure that an alternative manhole cover owner does so.	Contact:

Desc.:		
Location: There are 3 huge pot holes in this one spot, they are completely unavoidable unless you swerve onto the other side of the road. This is ridiculous as these are years old and have only grown bigger over time and they are not at a point where they will cause damage to cars. The potholes are in the right hand lane and go over onto the bus lane just as you turn left from ballgreen road onto corstorphine road	Contact:

Location: This entire stretch of road is peppered with dangerous pot holes. The one pictured is not the worst. Danger to life for cyclists using the road and pedestrians who would be unable to escape a car mounting the pavement in a blow out situation. See my previous report last year where a private hire vehicle sustained damage in this location - the repaired pot hole is now worse. **Contact:**

Please note the piece of broken coil spring in the picture.

The Buildings shake when the flix and megabus pass.

Location: road is very uneven especially around the manhole and you can swerve to avoid it on the outside lane. Sorry I have no safe way to take a picture of it, but it is very obvious when you look at the state of that road where cars are turning left to join the main road,

Classification: Request for service

After receiving an email stating this could take 5 days for a response I called in the issue/repair and received a reference number 101001403568. I felt this was a serious safety risk and did not wish to wait until someone else was seriously injured. I received an email reply which states the wrong location. Said location of bump in Road and where I fell as previously stated was in front of enterprise rent a car, in front of the bus stop.

Location: When will the pedestrian refuge island on Corstorphine Road, outside Edinburgh Zoo be fully repaired? The majority of the metal railings are missing or damaged and the temporary plastic railings have all been dislodged. The island is an absolute disgrace and offers no protection for the hundreds of pedestrians who use the crossing on a daily basis to visit the zoo. The island has been in this state for a number of weeks now and is an eyesore for both local residents and visitors to the zoo. **Contact:**

Location: The road from Corstorphine (including parts of St John's Road beyond Clermiston Road) all the way to Roseburn is in a dreadful state. It is particularly bad in the bus lane and I would urge those responsible for this stretch to review it urgently. The bus journey is a nightmare. There are so many buses on this route now that constantly patching it up is inadequate. It is embarrassing to us when visitors are doing the right thing and using buses but are then enduring such poor journeys

Location: Firstly, thank you for fixing the manhole in the road. fantastic!
We have just had the pavement dug up for a major power cable. The heavy machinery and open track have led to some faults which were not fixed by the tar contractor to Scottish power.
There is a large depression in the pavement at our driveway gate (39) which is a trip hazard . The old joints in the pavement have opened and will cause faults when the frost gets in, they need sealed. The drains are clogged with debris. **Contact:**
