About this Report

This report shows information around the OT waiting list to allow for closer monitoring of improvement work.

Data is sourced from Swift and is refreshed weekly on Monday.

Please note that figures may not be comparable to other reports showing Waitlist figures as different reports will have been built to different requirements.

Measures

- **Number of people on OT waitlist**- Number of people on the list with a role of "Adult Assessment" and "Unplanned Review" only. This will not include duplicates, but may include people where the end date is in the future.
- **Number of people on the waiting list more than once**- the number of people who have more than one assessment open on the list. Although these will not be counted as individual assessments if one is closed and the other remains, the number on the list will not go down
- **Average Waiting Time** - The overall average waiting time in days on the list
- **Longest Time Waiting** - The longest wait time in days for an assessment on the waiting list
- **Gap to target**- The current gap to the improvement target of 20% reduction (472)
- **Waitlist by Locality**- The current waitlist split by locality. "Other" teams includes, BEAT, Access Place, Telecare.
- **OT Waitlist Trend**- Trend chart showing the number of open roles/assessments weekly over time. This is filtered to new/reassessment only. Historic data may change where assessments are updated retrospectively.
- **Additions and Removals Trend**- Trend chart showing the number of additions to and removals from the waitlist each week for the last 6 months. The figures displayed are the weekly total. This is filtered to new/reassessment only.
- **Additions and Removals split by locality**- same as above but split at locality level.
