64953 Household waste container sizes, colours and images

Each container you issue — waste stream (residual / recycling / paper / glass / garden / food), type (wheelie / box / bag / caddy), capacity in litres, body + lid colours, and external dimensions in mm (width × depth × height) if you hold them.

140 litre bin for residual waste.

240 litre bin for dry mixed recycling.

240 litre bin garden waste.

44 litre box for glass.

23 litre caddy for food waste.

The typical household set — how many of each container a standard household usually receives (for example 1 residual + 1 recycling + garden), not only the menu of available sizes.

One of each, with the exception of a garden waste bin which is a paid service.

Whether a food caddy (kitchen + outdoor) is standard, and the sizes.

Yes, 23 litres.
