65208 Davidsons Mains Roundabout Works

I am requesting information with respect to the recent works completed at the roundabout at Davidsons Mains under TRO TEMP26/58, namely:

What was the original budget?

£283,776.68.

How much over/under the budget was the final project?

As the contract has yet to be completed, this figure is not yet known.

Who (original contractor or council) will be invoiced for any costs due to the roundabout works damaging vehicles/the Scottish Gas pipes/Scottish Water pipes?

Scottish Water and Scottish Gas have not requested any costs as damage was not a consequence of this scheme. In the first instance, damage to vehicles can be claimed from the Council. If it is found that the damaged was caused by the contractor, it will be forwarded for their attention.

Who (original contractor or council) will be invoiced for any costs due to the works taking place under CE009-S64864 (4156557)?

Any works/costs that emerge from the drainage investigation that are as a result of remedial work brought about by the contractor as part of the original scope of works, will be invoiced to the contractor. Any works/costs that emerge that are beyond the scope of the original works contract, will be paid for by the City of Edinburgh Council.

What lessons have been learned and implemented to ensure any problems raised do no occur again?

A ‘lessons learned’ exercise has been commissioned and will take place once the contract is complete. We aim to conduct this in December 2026.
